

INDEX TO VOL. XXXI.

- ADRENAL**, creatin-splitting ferment, 169.
- Alcohol, action on reflexes of frog, 300.
- ALDRICH**, T. B. On feeding young white rats the posterior and the anterior parts of the pituitary gland, 94.
- ALDRICH**, T. B. The iodine content of the small, medium, and large thyroid glands of sheep, beef, and hogs, 125.
- Anæsthetics, antagonism to salts, 255.
- Anaphylaxis, electrocardiogram in, xviii.
- ARMSBY**, H. P., and **J. A. FRIES**. The influence of standing or lying upon the metabolism of cattle, 245.
- Asphyxia, effect on reflex arc, 223.
- AUER**, J., and **S. J. MELTZER**. The splanchnics as a depressor nerve, xxi.
- AUER**, J. See **ROBINSON** and **AUER**, xviii.
- BARRINGER**, T. B., JR. See **HENDERSON** and **BARRINGER**, 288, 352, 399.
- BEUTNER**, R. New galvanic phenomena, 343.
- Blood, coagulation of, 1.
- pressure, affected by epinephrin, 59.
- —, depressed by adrenalin, 376.
- —, venous, influence on heart, 352.
- vessels, tonus affected by carbon dioxide and oxygen, 47.
- BURGE**, W. E. The rate of the destruction of ptyalin by the passage of the direct electric current, 328.
- CANNON**, W. B., and **H. LYMAN**. The depressor effect of adrenalin on arterial pressure, 376.
- CARLSON**, A. J. Contributions to the physiology of the stomach. — I. The character of the movements of the empty stomach in man, 151.
- CARLSON**, A. J. Contributions to the physiology of the stomach. — II. The relation between the contractions of the empty stomach and the sensation of hunger, 175.
- CARLSON**, A. J. Contributions to the physiology of the stomach. — III. The contractions of the empty stomach inhibited reflexly from the mouth, 212.
- CARLSON**, A. J. Contributions to the physiology of the stomach. — IV. The influence of the contractions of the empty stomach in man on the vasomotor centre, on the rate of the heart beat, and on the reflex excitability of the spinal cord, 318.
- Castration, relation to pituitary, xxiv.
- Cell, permeability, 335.
- Chick, digestion in, 439.
- Circulation, affected by aortic pressure, xiv.
- , effects of aortic compression, 193.
- , of strychnin in frogs with no lymph hearts, xix.
- , velocity of blood stream, 399.
- , volume of arterial blood stream, 288.
- Clock, electrical, xxvii.
- Coagulation, thromboplastic substance of tissues, 1.
- Cretenism, xxiii.
- CUSHING**, H. See **WEED**, **CUSHING** and **JACOBSON**, xiii.
- DEGENER**, L. M., and **A. E. LIVINGSTON**. The effect of thyroidectomy and castration respectively on the weight of the pituitary in the rabbit, xxiv.
- Digestion in chick, 439.
- EGGS** of *Fundulus*, development influenced by alkaloids, 131.

- Electromotive force of tissues, 343.
- ELLIS, F. W. The development of double refraction in the muscles of fish embryos, 370.
- Enzyme, creatin-splitting, of parathyroids and adrenals, 169.
- Epinephrin, relation to fatigue, xx.
- EYSTER, J. A. E. See MEEK and EYSTER, 31.
- F**ATIGUE, relation of products to epinephrin efficiency, xx.
- , seat of, 102.
- Ferments, destruction by electric current, 328.
- FORBES, A. The place of incidence of reflex fatigue, 102.
- FRIES, J. A. See ARMSBY and FRIES, 245.
- G**ALVANIC phenomena, 343.
- GESELL, R. A. The relation of pulse pressure to renal secretion, xxviii.
- GRABFIELD, G. P., and E. G. MARTIN. Variations in the sensory threshold for faradic stimulation in normal human subjects. — I. The diurnal rhythm, 300.
- Growth, of rats fed on pituitary gland, 94.
- GRUBER, C. M. The blocking of nerve impulses in the frog, 413.
- H**ARVEY, E. N. A criticism of the indicator method of determining cell permeability for alkalis, 335.
- Heart, affected by contractions of stomach, 318.
- , effect of aortic compression, 193.
- , efficiency related to venous pressure, 352.
- , influence of carbon dioxide, 64.
- , negative variation, course of, 31.
- , origin of beat, 421.
- , rhythm, 421.
- HENDERSON, Y., and T. B. BARRINGER, JR. The conditions determining the volume of the arterial blood stream, 283.
- HENDERSON, Y., and T. B. BARRINGER, JR. The influence of respiration upon the velocity of the blood stream, 399.
- HENDERSON, Y., and T. B. BARRINGER, JR. The relation of venous pressure to cardiac efficiency, 352.
- HOOKE, D. R. Perfusion of the respiratory centre in frogs—the influence of calcium and potassium on the respiratory rhythm, xvii.
- HOOKE, D. R. See KETCHAM, KING, and HOOKE, 64.
- HOOKE, D. R. The effect of carbon dioxide and of oxygen upon muscular tone in the blood vessels and alimentary canal, 47.
- HOSKINS, R. G. The relation of fatigue metabolites to epinephrin efficiency, xx.
- HOSKINS, R. G., and C. W. McCLURE. The comparative sensitiveness of blood pressure and intestinal peristalsis to epinephrin, 59.
- HOWAT, I. See HYDE, SPRAY, and HOWAT, 309.
- HOWELL, W. H. The nature and action of the thromboplastic (zymoplastic) substance of the tissues, 1.
- Hunger, related to contractions of stomach, 175.
- HYDE, I. H., R. SPRAY, and I. HOWAT. The influence of alcohol upon reflex action in the frog, 309.
- I**NTESTINE, peristalsis affected by epinephrin, 59.
- , tonus affected by carbon dioxide and oxygen, 47.
- J**ACKSON, D. E. A new form of spleen oncometer, xi.
- JACKSON, D. E. The peripheral action of certain drugs with special reference to the lungs, xxvi.
- JACOBSON, C. See WEED, CUSHING, and JACOBSON, xiii.
- Jaundice, xi.
- K**ETCHAM, C. S., J. T. KING, JR., and D. R. HOOKE. The effect of carbon dioxide on the isolated heart, 64.
- Kidney, ligation of arteries affects nitrogen excretion, xii.
- , secretion affected by pulse pressure, xxviii.
- , secretion in birds, 75.
- KING, J. T., JR. See KETCHAM, KING, and HOOKE, 64.
- L**ILLIE, R. S. Antagonism between salts and anaesthetics. — III. Further observations showing parallel decrease in the stimulating, permeability-increasing, and toxic actions of salt solutions in the presence of anaesthetics, 255.
- Liver, hematogenous jaundice, xi.

- LIVINGSTON, A. E. See DEGENER and LIVINGSTON, xxiv.
 LOEB, L. The influence of pregnancy on the cyclic changes in the uterus, xxv.
 LOMBARD, W. P. The surface tickle sense of the human skin, xv.
 LYMAN, H. See CANNON and LYMAN, 376.

MCCLENDON, J. F. The effects of alkaloids on the development of fish (*Fundulus*) eggs, 131.

McCLURE, C. W. See HOSKINS and McCLURE, 59.

MARTIN, E. G. See GRABFIELD and MARTIN, 300.

MEEK, W. J., and J. A. E. EYSTER. The course of the wave of negativity which passes over the tortoise's heart during the normal beat, 31.

MEIGS, E. B. Studies in the general physiology of smooth muscle, xxiv.

MELTZER, S. J. See AUER and MELTZER, xxi.

MELTZER, S. J. The effect of strychnin in cardiectomized frogs with destroyed lymph hearts, xix.

MENDEL, L. B. See OSBORNE and MENDEL, xvi.

MENTEN, M. L. The relation of potassium salts and other substances to local anæsthesia of nerves, 85.

Metabolism, carbohydrate, related to hypophysis, xiii.

—, effect of feeding proteins of maize, xvi.

— of cattle, affected by standing or lying, 245.

— of nitrogen, after ligation of renal arteries, xii.

MOORHOUSE, V. H. K. The action of various influences upon the rhythmicity of the nodal, sinus, and auricular musculature of the mammalian heart, 421.

Muscle, refraction of, 370.

—, tonus, affected by carbon dioxide and oxygen, 47.

NERVE, blocking of impulse, 413.

—, conduction, 413.

—, impulse, related to chemical changes, xxii.

Nerves, local anæsthesia, by salts, 85.

—, splanchnic, as a depressor, xxi.

—, threshold value of stimulation, 141.

ONCOMETER, for spleen, xi.

OSBORNE, T. B., and L. B. MENDEL. Feeding experiments relating to the nutritive value of the proteins of maize, xvi.

PARKER, G. H., and B. M. PATTEN. The physiological effect of intermittent and of continuous lights of equal intensities, 22.

PATTEN, B. M. See PARKER and PATTEN, 22.

Permeability of cells, 335.

PILCHER, J. D. On the excretion of nitrogen subsequent to ligation of successive branches of the renal arteries, xii.

PILCHER, J. D. See SOLLMANN and PILCHER, xiv, 193.

Pituitary, affected by thyroidectomy and castration, xxiv.

Pituitary gland, autonomic control, xiii.

—, effect of, on growth, 94.

PORTER, E. L. Thresholds of electrical stimulation in the spinal cat, determined by the Martin method, 141.

PORTER, E. L. Variations in irritability of the reflex arc. — I. Variations under asphyxial conditions, with blood-gas determinations, 223.

PORTER, W. T. An electrical clock, xxvii.

PORTER, W. T. The functional relation of the nerve cells in the vasomotor centre, xxix.

Pregnancy, changes in uterus, xxv.

Proceedings of the American Physiological Society, ix.

Ptyalin, rate of destruction by electric current, 328.

REFLEX action, affected by alcohol, 309.

Reflex arc, irritability affected by asphyxia, 223.

Respiration, bronchial muscles affected by drugs, xxvi.

—, influence on velocity of blood stream, 399.

—, rhythm altered by perfusing centre with salts, xvii.

ROBINSON, G. C., and J. AUER. Cardiac serum anaphylaxis in the rabbit as shown by the string galvanometer, xviii.

ROWE, A. H. On the creatin-splitting enzyme of the parathyroids and the adrenals, 169.

- S**ALTS, actions in presence of anæsthetics, 255.
- SHARPE, N. C. On the secretion of urine in birds, 75.
- SHAW, T. P. Digestion in the chick, 439.
- Skin, tickle sense, xv.
- SOLLMANN, T., and J. D. PILCHER. The effects of aortic compression on the circulation, xiv, 193.
- Spinal reflexes, affected by contractions of stomach, 318.
- Spleen oncometer, xi.
- SPRAY, R. See HYDE, SPRAY, and HOWAT, 309.
- Stimulation, faradic, threshold value in man, 300.
- , reflex, threshold value in spinal cat, 141.
- Stomach, contractions influence vasomotor centre, heart beat, and spinal reflexes, 318.
- , contractions inhibited reflexly from mouth, 212.
- , contractions related to hunger, 175.
- , movements in man, 151.
- T**ASHIRO, T. Chemical changes in the nerve fibre during passage of nerve impulse, xxii.
- TATUM, A. T. Studies in experimental cretinism, with suggestions as to a biological test for thyroid secretion, xxiii.
- Tickle sense, xv.
- Thyroid, biological test for secretion, xxiii.
- , creatin-splitting ferment, 169.
- , iodine content, 125.
- , relation to pituitary, xxiv.
- U**RINE, secretion in birds, 75.
- Uterus, cyclic changes in pregnancy, xxv.
- V**ASOMOTOR centre, affected by contractions of stomach, 318.
- , effect of aortic compression, 193.
- , functional relation of nerve cells in, xxix.
- Vision, effect of intermittent and continuous lights, 22.
- W**EED, L. H., H. CUSHING, and C. JACOBSON. Further studies on the rôle of the hypophysis in the metabolism of carbohydrates—the autonomic control of the pituitary gland, xiii.
- WHIPPLE, G. H. Hematogenous jaundice and its relation to the liver, xi.
